Objective

React Native Developer with **2.5 years of experience** building cross-platform mobile applications for Android and iOS using React Native, JavaScript, and TypeScript. Skilled in REST API integration, Firebase, Redux/Redux Toolkit, third-party SDK integration, navigation, performance optimization, debugging, and app deployment. Experienced in developing scalable mobile solutions with a strong focus on code quality, application performance, and production releases.

Experience

- **WebSenor [🌐]** *January 2026 - Present*
  App Developer
  - Working on scalable cross-platform mobile applications using **React Native** with **Redux Toolkit** for predictable and maintainable global state management.
  - Implementing complex application flows including authentication, role-based access, API-driven screens, and optimized navigation structures.
  - Collaborating closely with backend teams to integrate REST APIs, handle async data flows, error states, and improve overall app stability and performance.
  - Enhancing application performance and maintainability by refactoring legacy components, improving Redux architecture, and following clean code best practices.
- **TechCurators [🌐]** *June 2024 - December 2025*
  Web Developer (NearBite) Delhi
  - Developed a full-stack GIS-enabled food search platform that leverages geolocation and spatial data to optimize restaurant discovery and delivery operations.
  - Implemented **geolocation-based restaurant discovery** using latitude and longitude coordinates.
  - Built RESTful APIs with Node.js and Express for handling location-based queries.
  - Stored and managed spatial data (coordinates) in MongoDB.

Projects

- **Projects : HloTalk - Social & Dating App, Uguide (10K+ Downloads) - Travel App, First Choice Limo - Travel App**
  Tools: React Native, TypeScript, Redux Toolkit, Firebase, Agora, Socket.IO, REST APIs, Android, iOS
  - Integrated **Agora SDK** to implement real-time **audio and video calling**, including call initiation, receiving, call-state management, and real-time call events.
  - Implemented **Socket.IO** for real-time messaging, online/offline presence, call signaling, and instant event-based communication between users.
  - Integrated **Firebase Cloud Messaging (FCM) and Notifee** for push notifications related to messages, incoming calls, gifts, and other application events.
  - Implemented **over-the-air (OTA) updates** to deliver JavaScript and UI updates to users without requiring a full application release through the app stores.
  - Integrated **In-App Purchases (IAP)** for purchasing virtual coins/packages, including product configuration, purchase flow, receipt handling, and transaction management.
  - Handled **App Store and Google Play Store deployments**, including production releases, version management, build uploads, release configuration, and resolving store submission issues.

Skills

- **Programming Languages:** JavaScript, TypeScript
- **Mobile Development:** React Native, React Navigation, Android, iOS
- **Database:** MongoDB, MySQL
- **Firebase:** Firebase Cloud Messaging (FCM), Notifee
- **Real-Time Communication:** Socket.IO, Agora
- **Payments:** In-App Purchases (IAP), Razorpay
- **Version Control:** Git, GitHub, Bitbucket
- **Build & Deployment:** Android Studio, Xcode, Google Play Console, App Store Connect, OTA Updates

Education

- **AKTU** *2022 - 2024*
  MCA Lucknow, UP
